

Grand 4-T-Fyer™

Suggested Rations & Helpful Hints

CREEP FEED

50.0% Corn (cracked or flaked)	OR	70.0% Ground Ear Corn	OR	45.0% Corn
16.0% Oats		5.00% 32-34% Protein		25.0% Oats
9.00% Cottonseed hulls		5.00% Molasses		5% Wheat Bran
5.00% Molasses		20.0% Grand 4-T-Fyer™		5.00% Molasses
20.0% Grand 4-T-Fyer™				20.0% Grand 4-T-Fyer™

HIGH ENERGY (FINISHING) RATIONS

54.0% Corn	OR	45.5% Corn	OR	60.0% Corn
15.0% Oats		15.0% Oats		15.0% Oats
4.50% Cottonseed hulls		10.0% Barley		5.00% Molasses
1.50% Power Fuel™		4.50% Cottonseed hulls		20.0% Grand 4-T-Fyer™
5.00% Molasses		1.25% Soybean Oil		
20.0% Grand 4-T-Fyer™		3.75% Molasses		
		20.0% Grand 4-T-Fyer™		

MAINTENANCE/BREEDER/SHOW DIETS

37.5% Corn	OR	45.5% Corn	OR	34.75% Corn
15.0% Oats		22.5% Oats		25.00% Oats
20.0% Cottonseed hulls		4.50% Cottonseed hulls		5.000% Barley
7.50% Molasses		5.00% Wheat Bran		9.000% Cottonseed hulls
20.0% Grand 4-T-Fyer™		2.50% Molasses		1.250% Power Fuel™
		20.0% Grand 4-T-Fyer™		5.000% Molasses
				20.00% Grand 4-T-Fyer™

**The above are provided as options, consult your Honor® Show Chow® sales specialist for updates & further ration consultation.*

DID YOU KNOW?

- ▼ Wheat bran is an excellent alternative to cottonseed hulls. It's a good roughage that's bulky and has 17.64% protein and 4.5% fat on a Dry Matter basis!
- ▼ Beet pulp makes an excellent filler. You can feed it wet or dry in addition to the ration to add body depth and volume.
- ▼ Barley use is optional, and has shown to give a smoother, firmer finish. Adding to mix toward the end of the feeding period is recommended to achieve this desired look and feel.
- ▼ Cottonseed hulls typically come in 45#s, therefore inclusion rates are listed as 4.5%, 9%, etc.
- ▼ High Octane® Power Fuel™ is a cutting edge product, high in energy (31% fat) and very palatable. You can use it to increase intakes, add finish and it is a key tool in hair growth and retention.

MIXING DIRECTIONS & HELPFUL HINTS

When mixing rations, **PUT ALL GRAINS, ADDITIONAL ROUGHAGES, OILS & MOLASSES INTO MIXER FIRST AND MIX THOROUGHLY PRIOR TO ADDING GRAND 4-T-FYER™ OR OTHER PELLETS.** This reduces the amount of pellet breakdown and "fines," which is the main cause of customer complaints & intake problems associated with the use of this product.

Keep corn level at or below 60% - this will help reduce hair burn & fluctuations in intakes.

Adding additional roughages (ie. cottonseed hulls, beet pulp, wheat bran, etc.) to grower/breeder diets allows for control of fat depositing and will help in giving the appearance of more rib depth & volume.

Adjust molasses levels to accommodate mixer/feeder capabilities.

The use of Rumensin®, Bovatec® or CTC are recommended, but optional. Always follow label directions when using medications.

Feeding a minimum of 1-2 flakes of grass mix hay is beneficial to support digestion & maintain rumen function. Always provide plenty of fresh, clean water at all times.

Consistency is essential! Feed at regular times each day. Monitor intakes & watch for irregularities. If a ration change is needed, make sure to do it gradually over a period of 10-14 days

OPTIONAL: If you want to add fat quickly, we recommend supplementing your ration with High Octane® Power Fuel™. Include at variable levels depending upon the desired daily intake.

FEATURES

BENEFITS

- Contains Purina Mills patented "GOLD NUGGET"

- This fat-containing, high-energy "GOLD NUGGET" is a result of the Purina Mills unique manufacturing process
- The "GOLD NUGGET" provides a higher-energy ration
- Helps improve daily gain and a rapid deposition of finish

Animax®

- Purina Mills® highly palatable protein supplement that helps keep show animals on feed during stressful traveling periods

- Balanced combination of zinc, manganese, copper and cobalt
- Provides critical highly-available minerals that helps immune response which is critical for healthy traveling show cattle
- Helps maximize growth and muscle development allowing cattle to reach their full potential

- Research has shown that Tasco® helps lower body temperature during heat stress - keeping animals on feed

Diamond V

- A true, fermented yeast culture developed specifically for optimum animal nutrition. Research proven, Diamond V has a unique ability to enhance ration digestibility, palatability and intake by delivering a rich, all-natural nutrient source to the animal's digestive bacteria

- Contains cottonseed hulls

- A very palatable roughage source
- Provides consistent intakes

BUILDING BETTER ANIMALS
THE WINNING MATRIX

We know the best way to help you realize your dreams starts by stepping into The Checkerboard's Winning Matrix.

BETTER BREEDING

- Genetic Potential
- Selection
- Conformation
- Soundness

BETTER MANAGEMENT

- Cleanliness
- Showmanship
- Consistent Feed Times
- Daily Prep

BETTER FEEDING

- Consistent Intake
- Optimum Growth
- Body Condition
- Bloom & Finish

BETTER HEALTH

- Vaccination
- Proper Sanitation
- Health Program
- Veterinary Care

Tap into the critical cells of a successful Honor® Show Chow® program and the world of fun excitement and confident exhibitors. By plugging into this proven tradition, we believe your chances of reaching the winner's circle exponentially increase. For a winning experience and quality family time, it all starts and ends with The Winning Matrix.
