Show Chow® Goat Ration

A 16% protein, nutritionally complete, balanced ration with the proper vitamin and mineral ratios to promote strong, healthy show goats in both the growing and finishing phases.

Purina Mills® Show Chow® Goat Ration is supported by Purina Mills knowledge, experience and research.

FEATURES	BENEFITS
Nutritionally complete	Formulated for the unique nutritional needs of goats Provides the proper balance of high-quality proteins, vitamins, minerals and other nutrients – allows show goats to reach their full potential Digestible fiber source provides a safe, complete diet Proper calcium to phosphorus ratio - important in preventing urinary calculi and for proper skeletal growth
Bypass protein	Blend of protein to promote muscle synthesis and growth
	Balanced combination of zinc, manganese, copper and cobalt Provides critical highly-available minerals that helps immune response which is critical for healthy traveling show animals Helps maximize growth and muscle development – allows goats to reach their full potential
	Research has shown that TASCOS helps lower body temperature during heat stress - keeping animals on feed
 Diamond V YEAST CULTURE Confidence at the gut level [®]	Diamond V Yeast Culture is a true, fully fermented yeast culture developed specifically for optimum animal nutrition. Research proven, Diamond V Yeast Culture has a unique ability to enhance ration digestibility, palatability, and intake by delivering a rich, all-natural nutrient source to the animal's digestive bacteria. Diamond V Yeast Culture can help your animals reach a higher nutritional plane
Pellet form	Provides total nutrition in every bite Eliminates sorting and reduces feed wastage
Urinary acidifiers	Helps reduce the formation of urinary calculi Promotes extended show careers in show goats and healthier Pygmy goats.
Rumensin @ 20 grams/ton or Deccox Option	Aids in the prevention of coccidiosis, bloat and acidosis
Research-proven	Feed it with total confidence – <i>backed by Purina Mills' legendary tradition of fundamental and applied research – numerous winning entries at local and national shows</i>

FEEDING DIRECTIONS

Purina Mills® Show Chow® Goat Ration is a complete and balanced ration in pelleted form. It provides the nutritional extras kids need in both the growing and finishing phases. There is no need to add roughage or grain to the ration. Purina Mills® Show Chow® Goat Ration meets the specific nutritional needs of growing and finishing goats. Some goats may have a tendency to go off feed. When this occurs, feed long-stem grass hay for two to three days, then continue feeding Purina Mills® Show Chow® Goat Ration.

Typical Feeding Rates for Show Chow® Goat Ration

Goat's Body Weight, Lbs	Feeding Range, Lbs
30 - 50	1 - 2
50 - 70	2 - 2.8
70 - 90	2.8 - 4
90 - Market	4 - 5

Feed free-choice, having Show Chow® Goat Ration before kids at all times. Once your kids reach their desired weight, you may wish to reduce the amount of Purina Mills® Show Chow® Goat Ration and increase the amount of free-choice hay to maintain them in an ideal body condition. For lactating does, feed 3-5 lbs per 100 lbs of body weight depending upon their state of lactation. To maintain adult animals, feed 1-2 lbs per 100 lbs of body weight along with adequate roughage or pasture. These are only guidelines for consumption. Feed consumption will vary with life stage, environment and activity.

Product Code: 55F5 Show Chow® Goat DQ

Ask your dealer if Rumensin option is available in your market.

Important:

1. Start kids on colostrum milk from birth to 3 days of age. Feed Purina Mills® Kid Milk Replacer from 2 days until 4-8 weeks of age.
2. Use Purina Mills® Show Chow® Goat Ration as a creep feed for rapidly growing young goats prior to weaning.
3. If kids have not been creep-fed or they were purchased, they should be placed on grass hay on a free-choice basis after arrival. On the second day, feed Purina Mills® Show Chow® Goat Ration at the rate of 1% of their body weight and offer free-choice forage or hay. Gradually increase the amount of Purina Mills® Show Chow® Goat Ration and decrease the amount of hay over a 3-week period of time so that by the end of 3 weeks, they are consuming 3-4% of their body weight as Purina Mills® Show Chow® Goat Ration. After 3 weeks, Purina Mills® Show Chow® Goat Ration should be the sole diet and no additional forage is required.
4. When making a ration change, allow 3 to 5 days for animals to adjust to the new ration.
5. Keep a constant supply of complete feed available. Do not let fine material accumulate in feeders.
6. Provide adequate, well-protected and well-managed bunk space for each animal to prevent feed from becoming wet or moldy.
7. Provide a source of fresh, clean water at all times.
8. Feed salt free-choice.
9. Feed Purina Mills® Goat Mineral free-choice.
10. Consult your veterinarian for the recommended health program for your local area. This includes internal and external parasite control.
11. This product contains copper and should not be fed to sheep. In groups of goats, there are certain animals that experience chronic bloat or other digestive disturbances, and consequently are poor performers. In addition, excess feed consumption, severe weather changes resulting in erratic feed consumption and poorly-managed feeding practices can increase the incidence of bloat in all goats. If bloating occurs, the above management practices should be reviewed and your veterinarian consulted.

Caution:

Store in a dry, well-ventilated area free from all rodents and insects. Do not use moldy or insect-infested feed.
