### Purina Mills® Show Lamb Ultratoner 18

*Purina Mills® Show Lamb Ultratoner 18 is a nutritionally complete, highly fortified, balanced sweet feed designed for show lambs to promote optimum growth and development during the growing and finishing phases. Purina Mills® Show Lamb Ultratoner 18 has been developed through years of research and applied technologies.*

FEATURES	BENEFITS
----------	----------

Nutritionally complete feed

Quality processed grains plus all the essential vitamins and minerals required for optimum growth and development during growing and finishing – allows show lambs to achieve their full potential  
Complete nutrition for muscle and bone development  
Helps promote excellent show condition without producing too much fat cover

Increased energy

Promotes optimum weight gain during exercise periods

Contains barley and linseed meal

Promotes great finish

Patented by-pass protein

Provides high-quality proteins for muscle development

Provides critical highly-available minerals that helps immune response which is critical for healthy traveling show lambs

Helps maximize growth and muscle development – allows lambs to reach their full potential

Research has shown that TASCOS helps lower body temperature during heat stress - keeping animals on feed

Confidence at the gut level™

Diamond V Yeast Culture is a true, fully fermented yeast culture developed specifically for optimum animal nutrition. Research proven, Diamond V Yeast Culture has a unique ability to enhance ration digestibility, palatability, and intake by delivering a rich, all-natural nutrient source to the animal's digestive bacteria.

Diamond V Yeast Culture can help your animals reach a higher nutritional plane.

Contains ammonium chloride

Urinary acidifier added to help reduce the incidence of urinary calculi

Research proven

Feed it with total confidence – backed by Purina Mills' legendary tradition of fundamental and applied research – numerous winning entries at local and national shows

Medication option:  
Decoquinat

Decoquinat aids in the prevention of coccidiosis  
No withdrawal time required

Regional Availability

Check your current price list for availability in your region, or contact your local Purina Mills Representative for more information.

Vitamin D, IU/lb	(min)	250.00

## FEEDING DIRECTIONS

Typical feeding rates of Show Lamb Ultratoner 18.

These are only guidelines for consumption. Feed free-choice, having Purina Mills® Show Chow® Ultratoner 18 before lambs at all times following weaning until completion of the show season. We recommend feeding 1/4 flake of medium-quality hay per head per day.

**Important: Follow these management practices:**

1. When making a ration change, allow 3-5 days for animals to adjust to the new ration.
2. Provide a source of fresh, clean water at all times.
3. Keep a constant supply of complete feed available to lambs.
4. Do not allow fine material to accumulate in feeders.
5. Provide adequate, well-protected and well-managed bunk space for each animal to prevent feed from becoming wet and moldy.
6. When fed from a self-feeder, adjust feeder to minimize quantity of feed accumulating in trough.
7. Lambs should be vaccinated against enterotoxemia.
8. Consult your veterinarian for the recommended health program for your local area. This includes internal and external parasite control.

In groups of lambs, there are certain animals that experience chronic bloat or other digestive disturbances, and consequently are poor performers. In addition, excess feed consumption, severe weather changes resulting in erratic feed consumption and poorly-managed feeding practices can increase the incidence of bloat in all lambs. If bloating does occur, the above management practices should be reviewed.

**Caution:**

Store in a dry area away from insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, abortion or death.

**Important Tips for Raising Award-Winning Lambs**

Efficient production requires a thorough understanding and application of the fundamental principles of good husbandry and sanitation. These include:

1. **GOOD BREEDING:** Good breeding gives poultry the ability to perform satisfactorily and produce healthy offspring.
2. **GOOD NUTRITION:** An adequate amount of a balanced ration containing all required nutrients, vitamins and minerals is essential for good health and proper conformation.
3. **SOUND MANAGEMENT:** "Know How" is required to provide the proper environment and care to minimize stress, which can adversely affect development.
4. **CAREFUL SANITATION:** Cleanliness is essential in providing a healthful environment.

These are the building blocks of the Purina Mills® Show Chow® lamb program and the keys to successful production. Practical application of these basic principles will not only enhance your animal's growth and development, but also increase its potential of winning on the show circuit.

### Typical Feeding Rates for Lamb Ultratoner 18 32LB
