Show Chow® Pig Final Push

The Purina Mills Research Team has developed a specially formulated, complete pelleted feed designed to meet the exact needs of show pigs. This is a 19.5% protein and 1.3% lysine feed containing Paylean® is designed for the final 45 to 90 lbs of weight gain.

We suggest Show Chow® Final Push be preceded by Show Chow® Foundation or Show Chow® Pig Basis 18.5.

Show Chow® Final Push delivers the cutting edge nutrition technology and optimum performance for show pig genetics. It is supported by Purina Mills knowledge, experience and research.

FEATURES	BENEFITS
Research formulated as the "Final Push"	Nutrient-dense formulation to maximize muscle formation during final show preparation Delivers the "pop" you want at show time Pigs maintain bloom - you can see the difference
"Ultra" proteins	Select fishmeal to help improve feed intake and digestibility Spray dried red blood cells provide extremely high digestible amino acids Dehydrated eggs – the gold standard in protein quality
Complete Pelleted Ration Paylean® 9 grams/ton	A repartitioning agent that maximizes nutrition to develop muscle shape and definition High energy feed that continues to add body condition even when building muscle Builds lean muscle mass and body cover so pigs are show ready
Use of digestible feed ingredients	Includes ingredients thoroughly tested for nutrient availability and palatability
Pantothenic Acid	Proper level of this key ingredient helps lean deposition and helps maintain meat quality
Chromium	Proper level of this key ingredient helps optimize muscle expression
Increased level of Vitamin E	Antioxidant that helps maintain a healthy immune system

FEEDING DIRECTIONS

Show Chow® Pig Final Push is designed for the final 45 to 90 lbs weight or show weight as directed by your Purina Mills representative. Weigh pigs regularly and adjust feed volume to achieve the desired weight at the desired time. Depending on genetics, gender, body weight, environment and desired rate of gain, pigs may consume between 6 and 10 lbs of feed per day. No withdrawal time required.

Important: This product is to be fed only to the animal species as directed on the label.

Follow these management practices:

1. Provide a source of fresh, clean water and adequate drinking space per pig at all times.
2. Provide a draft-free pen with clean, dry sleeping area. Keep feed and water at the opposite end of the pen from the bedding area.
3. Any ration change should be made gradually to avoid digestive upsets that could result in scours.
4. When using a self-feeder, make sure it is adjusted to minimize feed wastage. Feeders should be well-managed so as to provide adequate feeder space, prevent moisture condensation, mold and insect development.
5. Consult your veterinarian for recommended health programs in your area.
6. Observe withdrawal times for medication used.

Caution:

Use only as directed. Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness or death.

Important Tips for Raising Award-Winning Pigs

Efficient production requires a thorough understanding and application of the fundamental principles of good husbandry and sanitation. The Purina Mills® 4-Square program will help you step into the spotlight.

- 1. GOOD BREEDING:** Practice a sound genetic program of selection and culling. Know the feeling when you have that perfect animal that has the best potential to win.
- 2. GOOD FEEDING:** Proper nutrition for different needs and lifestyles starts with Show Chow® products. You can't become a Grand Champion without the best nutrition.
- 3. SOUND MANAGEMENT:** A clean environment minimizes stress and improves average daily gains. The daily attention to detail is the difference between a Grand Champion and lower placement.
- 4. PREVENTATIVE HEALTH:** Establish an effective health program with your local veterinarian. A sick animal never makes it to the top.

These are the building blocks of the Purina Mills® Show Chow® program and the keys to successful production. Practical application of these basic principles will not only enhance your animal's growth and development, but also increase its potential of winning on the show circuit.
