FEEDING DIRECTIONS

Feed as sole ration to turkeys, following Show Chow Turkey Starter, through showing.

Important:

A feeding program is only as effective as the management practices and disease control measures followed.

Caution:

Store in a dry area away from insects. Do not feed moldy or insect-infested feed to birds as it may cause illness, performance loss or death.

Important Tips for Raising Award-Winning Poultry

Efficient production requires a thorough understanding and application of the fundamental principles of good husbandry and sanitation. These include:

- 1. GOOD BREEDING:** Good breeding gives poultry the ability to perform satisfactorily and produce healthy offspring.
- 2. GOOD NUTRITION:** An adequate amount of a balanced ration containing all required nutrients, vitamins and minerals is essential for good health and proper conformation.
- 3. SOUND MANAGEMENT:** "Know How" is required to provide the proper environment and care to minimize stress, which can adversely affect development.
- 4. CAREFUL SANITATION:** Cleanliness is essential in providing a healthful environment.

These are the building blocks of the Purina Mills® Show Chow® poultry program and the keys to successful poultry production. Practical application of these basic principles will not only enhance your birdss growth and development, but also increase its potential of winning on the show circuit.
